Solar System Quote

Quote no: Q-TEST Date: 24 October 2026

Prepared for: Mallam Musa

Recommended system

Solar panels	5 x 550W (2.75 kW)
Batteries	2 x 48V 100Ah Lithium (LiFePO4) (9.6 kWh)
Inverter	1.5 kVA, 48V system
Charge controller	80A MPPT

Your appliances

Appliance	Watts	Qty	Day hrs	Night hrs	Wh/day
LED bulbs	10	8	0	6	480
Ceiling fan	75	3	6	8	3,150
TV (43 inch)	100	1	3	4	700
Fridge	150	1	12	12	3,600
Phone & laptop charging	65	2	3	2	650

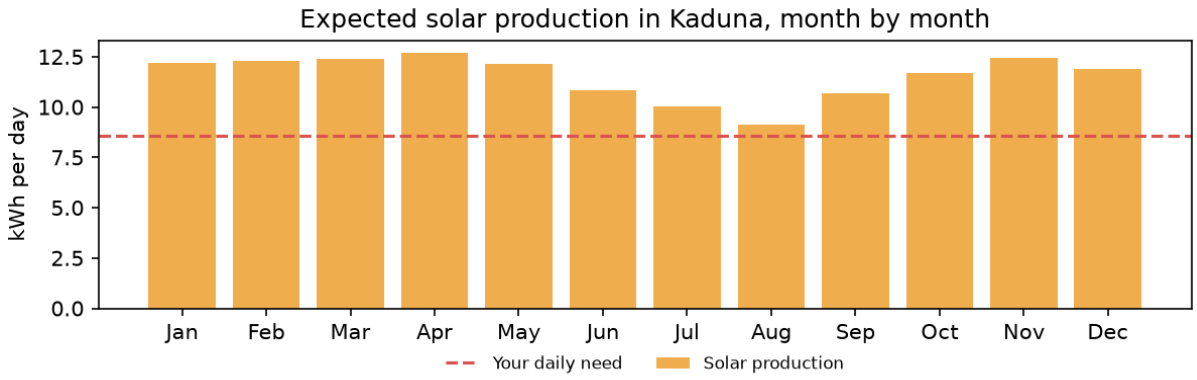
Total: 8.58 kWh per day (4.74 kWh at night), peak load 685 W

Price

Solar panels	NGN 825,000
Batteries	NGN 2,880,000
Inverter	NGN 270,000
Charge controller	NGN 320,000
Installation & accessories	NGN 644,250
TOTAL	**NGN 4,939,250**

Why this size?

This system is designed for Aug, the least sunny month in Kaduna (4.42 kWh/m2/day on average, from 10 years of NASA satellite data). Systems sized for average sunshine often run out of power during the rainy season. Sizing for the worst month means your power keeps running all year.



Solar data: NASA POWER (power.larc.nasa.gov). Quote valid for 14 days. Prices may change with exchange rates.
